

Main Idea: How are educational outcomes affected by different factors across New York State?

Draft Questions:

1. Districts with 1 STD above and under the mean and how they relate in terms of graduation rate.
2. How do the districts that receive federal funding fare against the ones that don't?
3. Is there a correlation between educational funding and median income per household? Graduation rate? Dropout rate? Percentage of students that are a minority?
4. Heat map showing districts with different filters. Possible filters are - median income, funding per student, male and female enrollment.
